Correct stimulus (or pressure) provided by correct environment = correct growth for health and dynamic equilibrium. Inappropriate environmental stimulus = incorrect growth and/or trauma. The recommendations below are guidelines to help you provide correct stimulus for the return or maintenance of health of your horse's feet, based on your horse's spectrum at the time of your appointment. Assess your horse daily as your horse's health status may change! Failure to follow recommended guidelines could result in inappropriate stimulus and could cause harm to your horse's health and welfare. If you require further clarification, explanation or assistance please do not hesitate to ask. If you are in any doubts about your horse's health or welfare, **contact your veterinarian for advice.**

TREATMENT RECOMMENDATION	QUALIFYING REASON	RECOMMENDED PRODUCTS/ STIMULUS	RECOMMENDED USE/ADDITIONAL NOTES and SUGGESTIONS
INFECTION CONTROL FROG <input type="checkbox"/> HOOF WALL <input type="checkbox"/> OTHER <input type="checkbox"/> _____ _____	Infection undermines health and conformation of tissues/ structures and can cause trauma and discomfort if not addressed appropriately. Can be caused by incorrect external or unhealthy internal environment, or both.	CLEAN TRAX <input type="checkbox"/> SILVETRASOL <input type="checkbox"/> PHW <input type="checkbox"/> ARTI-MUD <input type="checkbox"/> OTHER <input type="checkbox"/> _____ _____	
EXERCISE HAND WALK <input type="checkbox"/> RIDDEN WORK <input type="checkbox"/> TARMAC <input type="checkbox"/> OTHER <input type="checkbox"/> _____ _____	Correct stimulus or movement helps correct growth of structures required for healthy internal arch apparatus. Too much or incorrect exercise can cause trauma and or discomfort which further reduces exercise capacity and health of feet.	PHW <input type="checkbox"/> BOOTS <input type="checkbox"/> SOLE MATE PADS: 4lb <input type="checkbox"/> SOLE MATE PADS: 6lb <input type="checkbox"/> SOLE MATE PADS: 9lb <input type="checkbox"/> OTHER <input type="checkbox"/> _____ _____	
OTHER PROFESSIONALS VETERINARIAN <input type="checkbox"/> OTHER <input type="checkbox"/> _____ _____ _____	A team approach with your vet and other alternative care providers and integration of professional services ensures a holistic approach. You are required by law to provide adequate health (vet) care for your horse.		
ENVIRONMENT _____ _____ _____	Environmental stimulus is everything which the horse tastes, smells, hears, touches and 'senses'.	Inappropriate environment can cause harmful levels of trauma or stress and can effect metabolism and whole horse health
